INTERVIEW

What makes you a market expert in your country?

AREMIS group is a well-known independent consulting and technology firm dedicated to real estate, facilities and workplace management with more than 20 years of experience in Eastern countries. We work for 150+ clients in the industry and the finance sector as well as insurance companies and the public and supranational sector.

What experience have you already gained in international projects?

Together with our long-term clients and partners, we already realized technology (CAFMIWMS) deployments in Europe, Americas and Asia as well as FM consulting assignments in Brazil and Japan.

How would you describe the status of Real Estate Management in your country?

Real Estate Management practices are still varying across countries in Europe, with strong local specialties driven by the local cultures. Workplace management has different maturity levels. Outsourcing models are still evolving between global IFM contracts and silo contracting in a landscape of heterogeneous suppliers. Generally speaking, there are still huge opportunities for cost and carbon footprint savings and corporate agility increases thanks to innovating workplace management approaches.

EXPERTISE
